Past Mx

Summary: Patient got road traffic accident on 14-3-2024 and was admitted in the hospital due to motor vehicle collision, according to the medical reports issued, the patient suffered from : L3 vertebral fracture, compressed spine fracture, hematoma of scalp, abrasion of forehead, abdominal injury, chest injury, back injury

DD:

Overall impression now and future needs:

Patient was reviewed today in my clinic, and his injury condition has stabilized and has become final in nature and character, as a result of the traffic accident that the patient experienced on the aforementioned date and state the following :

Investigation

HQ7306an

Diagnosis

1. He still has pain in his back with difficulty doing his routine daily activity.
2. He has healed from abdominal and chest injury.
3. Avoid weight bearing, aggressive movements, lifting heavy objects and or to do sportive activity
4. He advised to take oral pain killers for his pain if needed.
5. According to the current situation, in consideration of the above finding his disability considered as 20% from the power of his back, and due to his traumatic head injury as 5 % of his mental power, there is decrease in the mental activity regarding memory and attention.
6. Patient is unable to go back to his work.
