CLINICAL FINAL EXAMINATION REPORT

Name: Ali Hassan Muhammad Yaseen.
Occupation: Driver
Date:08-11-2025

Summary: Patient got road traffic accident on 14-08-2025 and was admitted in the hospital due to motor vehicle collision, according to the medical reports issued, the patient suffered from distal radius fracture, displaced comminuted fracture of the distal shaft of the radius extension along articular surface with carpal bones, swift tissue swelling around wrist joint, left scalp hematoma, displaced fracture of styloid process of ulna .

Overall impression now and future needs:

Patient was reviewed today in my clinic, and his injury condition has stabilized and has become final in nature and character, as a result of the traffic accident that the patient experienced on the aforementioned date and we state the following:

1. He cannot carrying weights on the left hand, also he is suffering from limited movement .
2. He has healed from scalp hematoma.
3. Patient has required physical therapy for minimum 6 months .
4. Avoid weight bearing, aggressive movements, lifting heavy objects and or to do sportive activity.
5. According to the current situation, in consideration of the above finding his disability considered as 25% from the power of his left upper extremity, and disability of the skin can be calculated as 10% of the total skin.
6. The patient will have difficulty working as a driver
